

▪ aquaVEND ▪ 06

Unpleasant tastes and odours and chlorine residue in the water impair the aroma and quality of hot and cold drinks from machines.

Your advantages with BRITA AquaVend 06:

- + **Versatile:** flexible installation even where space is limited. The compact filter cartridges can be operated horizontally and vertically.
- + **Reliable:** silver impregnation of the activated carbon stems bacterial growth.
- + **Efficient:** extra high capacity of the BRITA activated carbon ensures constantly high water quality for all drinking water.

Note:

AquaVend should only be used to filter drinking water. To treat water with high carbonate hardness (limescale content) please ask about our AquaQuell 06 filter cartridges and other AquaQuell systems.

AquaQuell Technology

Removes unwanted tastes, odours and chlorine from the water using activated carbon. The special silver treatment of the BRITA activated carbon specifically stems bacterial growth. An additional treatment process prevents the discharge of carbon particles.

Technical Specifications

AquaVend 06-E is the same filter, but designed to fit an Everpure®* filter head.

	AquaVend 06-B
Total system height (incl. wall mounting)	405 mm
Height for filter change (ap-	435 mm
Filter head width (including connecting thread without hoses)	114 mm
Depth	91 mm
Maximum operating pressure	8 bar (116 psi)

Operating temperature	4°C - 30°C
Typical usage period ¹	10,000 litres at 10 °KH, or 6 months

Certified BRITA quality

Filter cartridges inspected for burst pressure by TÜV Product Service.

The food quality of BRITA water filter products has been inspected and confirmed by an independent institute.

¹ The specified capacity is intended as a guideline only and may vary depending on the product volume flow and machine type.
