

aquaQUELL · 06-BC

Even the best drinking water can contain a high proportion of carbonate hardness. The result: limescale deposits in coffee machines cause failures and increase service and operating costs.

Your advantages with BRITA AquaQuell 06-BC:

- + Low investment and reduced service costs
- + Compact dimensions
- + Can be used horizontally or vertically

The advantages for coffee connoisseurs:

- + Best coffee aroma
- + Constantly high coffee quality

AquaQuell Technology

The AquaQuell 06-BC filter cartridge is made of a special plastic housing and contains a special filter media. This filter media is designed to remove limescale deposits from the water. The result is a soft, limescale-free water that is ideal for coffee machines. The AquaQuell 06-BC filter cartridge is also suitable for use in other household appliances.
