

## ::aquaQUELL:: 1.5

Improved BRITA AquaQuell technology offers even more protection against scale deposits, reliably removes odours and off tastes from water and guarantees maximum machine performance with consistent product quality.

### Your advantages with BRITA AquaQuell 1.5:

- + consistent high water quality
- + filtered by-pass water
- + variable by-pass setting offers flexible use
- + reduced operating costs thanks to interchangeable cartridge principle
- + space-saving installation, with horizontal or vertical cartridge positions
- + guaranteed product quality
- + simple and quick filter exchanges
- + filter head compatible with BRITA filter cartridge type 06E.

### AquaQuell Technology

Reduces carbonate hardness in water and preventing scale deposits. Removes unwanted odours and off tastes, chlorine and heavy metals that impair the aroma and the attractiveness of food and drink. The filter safely retains any coarse and fine particles.
