

Fluid-o-Tech Mono Pump

The Mono oscillating piston pump is designed to provide a reliable and quiet flow of liquid under continuous operation. It is available in a range of sizes and materials to suit different applications. The pump is designed to be able to further reduce noise during operation.

Typical Applications

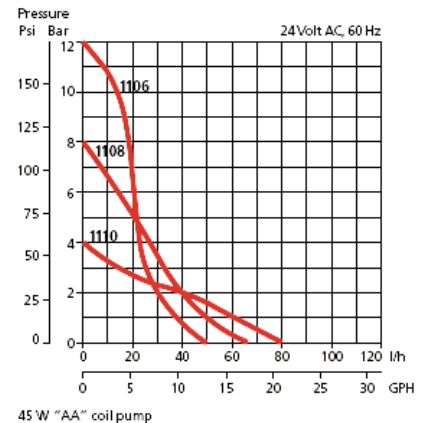

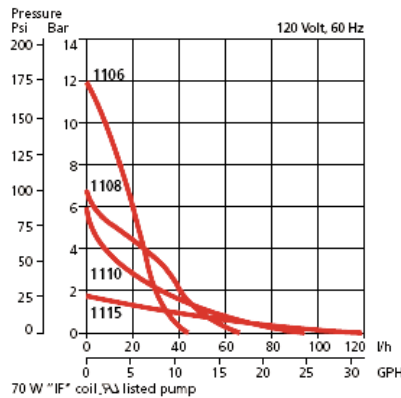

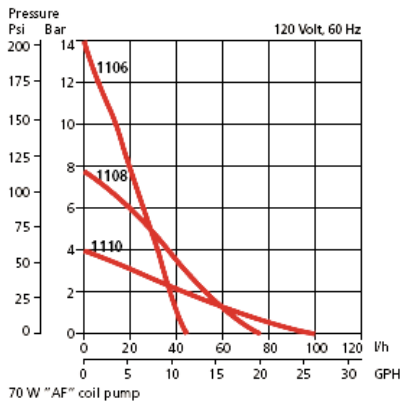

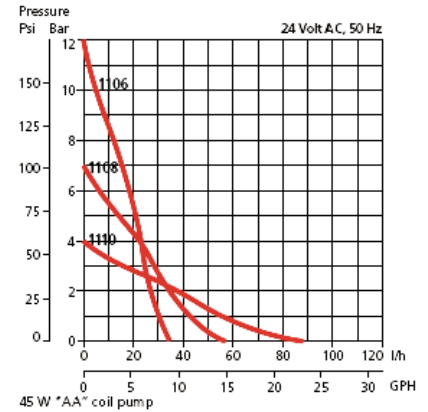

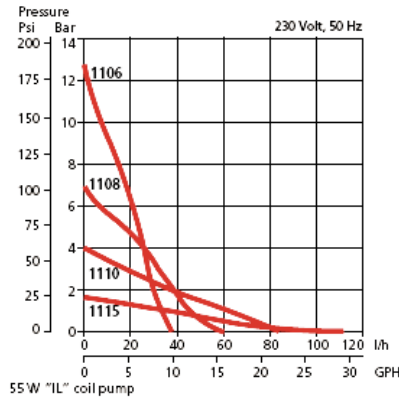

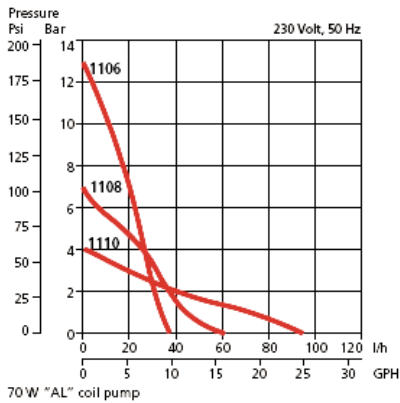

The Mono oscillating piston pump is designed to provide a reliable and quiet flow of liquid under continuous operation.

- + Beverage vending machines
- + Smoke generators
- + Steam generators
- + Carpet cleaners
- + Water Carbonators
- + Yac... (likely Yacht pumps)
