

# Pumps for water-fed window clean systems

Helping *you* keep *your* business moving

## We understand...

You're running your own business, trying to keep your customers happy, your staff busy and your order book full. The last thing you need is to waste time and money trying to find spares to keep your kit working.

We understand the pressures - we're a small family owned business ourselves, and so are many of our suppliers. That's why we've got together with Aquatec to offer this range of replacement pumps to keep you and your equipment on the road. We'll take your order over the phone, we'll get your pump to you next day - you'll even find our prices pretty good!

Because we just want to help *you* keep *your* business moving.

## Reliability designed in

Aquatec pumps have been designed with reliability in mind - from the construction of the diaphragm, which has a unique shape and anti-friction coating to prolong pump life, through to the high-grade stainless steel and nylon parts, and the patented wrap-around vinyl label that minimizes corrosion even in humid, damp environments.

# The pumps...

## Pole pumps

Used to feed the water to the cleaning pole, standard pumps have an in-built pressure switch and range in performance from single pole pumps, to multi-nozzle or twin pole pumps.

Vari-speed pumps are also available to order. Power options include 12v or 24v DC variants to operate from a vehicle battery, or a 230v AC variant for mains use.

## High capacity transfer pumps

These are typically used to transfer water quickly and efficiently from a base storage tank into a truck or van tank for mobile use.

With flow rates of up to 12 litres per minute, it can fill a 1,000 litre mobile tank in a little over an hour.

## RO booster pumps

For pressurising the feedwater supplying a Reverse Osmosis (RO) membrane.

The most popular version runs on 230v AC mains power, for use where the pure water is produced. A 12v DC van mount version is also available - just ask us.

## Performance

Typical pole pump output

Pressure (PSI)	Flow rate (LPM)
70	3.8
60	4.0
50	4.4
40	4.5
30	4.7
20	4.9
10	5.1
Open	5.3

Whatever the performance requirements - RO, pole feed or fast tank filling, there is an Aquatec pump offering just the right pressure and flow-rate.

Not for nothing is Aquatec the choice in market leading systems across Europe and the UK.

## Convenience

Changing a pump can be time consuming - and let's face it, it always happens when you least want it to.

With the Quick Disconnect push-pull fittings from Aquatec, changing a pump just got a whole lot easier, which means you can spend more time cleaning windows and less time fixing equipment.

Or what about a handy measure of water quality? No chemicals, no paper strips - just a simple, pocket-sized device to give you total confidence every time. Now that's convenience.
